

As part of your affiliations with Centrepont Alliance, we are pleased to let you know Security in Depth can provide you with a discounted cost for your cyber review program.

Security in Depth, believe in the power of collaboration and strong partnerships. Their version of a cyber review program which they call CARR (Cyber Assurance Risk Rating), is a comprehensive review of your cybersecurity posture, risks, and best practices. It provides you with a detailed outcome report and recommendations on how to improve your cyber resilience and protect your data and assets. It also includes complimentary templates that Security in Depth will provide you with to fulfill your obligations from a governance/documentation perspective.

Security in Depth review over 3,000 financial planning businesses across Australia on an annual basis, so you can be sure that they understand your industry well, along with exactly what you need in place for best practice from a cyber security perspective. Security in Depth are confident that the CARR program will help significantly enhance your cyber maturity, as well as to help ensure that the sensitive and valuable client information you hold is as secure as can be.

Outside the technical requirements, their cyber reviews also have a significant focus on governance, and this incorporates the following:

- **Cyber Policies and procedures**
- **Cyber Training & Awareness**
- **Cyber Risk**
- **Incident response**

Details of Security in Depth's Cyber Assurance Risk Rating 'CARR' review program and what is included:

- ✔ **Initial Cyber Review:** A thorough 90-minute review conducted online by one of Security in Depth's experienced cyber security consultants via Microsoft Teams that delves deep into all facets of your organisation's cyber infrastructure.
- ✔ **Detailed Outcome Report:** Post-review, the Security in Depth team will email you a comprehensive outcome report showing the current cyber maturity level of your business and highlighting areas that need improvement with a list of practical remediations.
- ✔ **Follow-Up Validation Review:** This is recommended to be conducted 3-6 months after your initial review. It includes a 45-minute online meeting with one of the consultants from Security in Depth, to validate that all remediations listed in your initial CARR outcome report have been implemented effectively. You will then receive an updated outcome report with improved scores reflecting accordingly.

The CARR review program focuses on the following key areas critical to the cybersecurity framework of your business:

- **Identify:** Assessing your organisation's understanding and management of cyber risk in terms of people, process, and documentation.
- **Protect:** Evaluating the technologies and strategies in place to safeguard your business from cyber threats.
- **Detect:** Reviewing your internal monitoring systems and their efficacy in detecting cyber incidents.
- **Respond:** Examining your crisis management, incident response plan, stakeholder communication, and processes for managing a cyber incident.
- **Recover:** Analysing your business continuity plans, backup systems, and disaster recovery procedures post a major cyber incident.

Discounted price for CARR Review Program including all the above:

Cost: \$600 + GST.

If you're ready to proceed, please use the link below to book your initial cyber review with Security in Depth. If you have an external IT provider, they should join the review since they'll need to show our consultants certain admin areas in your Microsoft 365 or Google environment by sharing their screen.

Once you book, forward the meeting invite to your IT provider or anyone else you'd like to join from your business.

Link to proceed and book in your initial cyber review:

Security in Depth's accounts team will email you an invoice with a 7-day payment term after we receive your booking. After your initial review and receiving your outcome report, you'll get a link to book your Follow-Up Validation Review.

Security in Depth look forward to the prospect of working with you and helping you fortify your cyber defences, to be there to support you and help you achieve your cybersecurity goals.

**Kickstart your CARR journey
