Dalibor Ivkovic
Salestrekker CEO and Founder

We robustly tested Annature - it easily managed every aspect - integration, performance, security, customer service and price. A very different experience to what we'd encountered with non-Australian signature companies.

Etienne Rizzo
Deposit Assure CEO and Founder

Changing over from DocuSign to Annature has been a really positive move, saving my business time and money! Costs had continued to rise with DocuSign even though our scope had never changed.

Annature on the other hand, from day one, really understood our requirements and tailored a custom solution to meet our needs.

We have a dedicated local account manager with a mobile phone number for troubleshooting and their API integrates seamlessly with our system, doing everything we need it to do.

In short I can't recommend Annature enough as it really is the best in class solution for eSigning.

Elevate your eSignature experience with seamless integration across extensive network integrations and cutting-edge APIs.

Allow your employees to send and track agreements directly from the applications they use daily, ensuring a streamlined workflow.

Initiate post-signature processes, including payments, account provisioning, and employee onboarding, automating key tasks for enhanced efficiency.

Bring out your creativity and tailor unique experiences by leveraging our APIs, allowing you to build custom solutions that perfectly align with your business needs.

- ✓ **Legal:** Annature meets requirements across the globe including AU, US and EU.
- ✓ **Security:** ISO 27001 certified and that we are committed to the highest level of information security.
- ✓ **Storage:** All data is stored securely in Australia under best practices with regular audits and governance.
